MANSFIELD B.C. Qld 4122

Hi Vince,

Just a few lines to follow up on our trialling of your new Nature One BBQ Cleaner Degreaser product last month.

I must admit I was quite skeptical at first to trial your natural product, but after your demonstration at the factory on several heavily soiled BBQ plates, I decided to give it a go.

As you would be aware, we currently use several methods for cleaning barbeques including different types of chemical cleaners and sandpapers to remove built up burnt and ingrained residues of marinades, grease and grime.

Vince, we were certainly surprised how well your natural BBQ Cleaner Degreaser worked. As per your instructions, we used scourers in some situations with the product. It performed well above expectations, being in some cases, equal or better than its toxic chemical counterparts.

Vince, we will continue to use your product and certainly would recommend it. The benefits to our business were twofold.

Firstly, the way it performed so well in different situations, cleaning and sanitizing plates, splashbacks and benchtops. It certainly cleans a wide variety of materials.

Secondly, the safety issue which is a bonus using a cleaner that is non toxic, chemical free and biodegradable.

Thanks again for your help.

Best regards,

Peter Hurley
Managing Director
