Can we please order 1 pack of 10 Nature One Pet Odour Eliminator 250mL sprays.

The girls were not too impressed with the product until we had a dog with parvovirus kept locked in a cage for a week. Parvo is the most foul smelling bloody diarrhoea. I sprayed the odour eliminator in her isolation room and within two minutes it smelt better than the rest of the surgery! If you let vet surgeries know that they can get rid of Parvo smell with this product it will definitely be a seller!!

Cheers!! You made a horrible job a little easier!
